## ever prevention

Take proper disease prevention precautions to ensure health and peace of mind.

Watch out for the following symptoms within 14 days of returning to Taiwan.

**Disease Prevention** Announcement

If you experience fever, headaches, rashes, joint pain, abdominal pain, conjunctivitis, or pain behind the eyes, please seek medical attention as soon as possible.

**Fever** Headaches

Rashes

Joint pain Abdominal pain

Nausea Anorexia

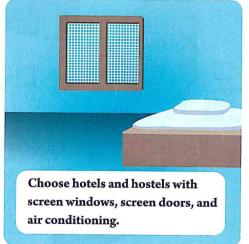

Conjunctivitis Pain behind the eyes

**Protective Measures** 

Take precautions when going to areas with dengue fever and Zika virus:

After returning from an area with dengue fever or Zika virus, do not donate blood for at least 1 month. Do not engage in sexual behavior for at least 6 months, or use condoms when engaging in such behavior.
